

High Quality Aluminum GPS Fuel Sensor

Advanced GPS Fuel Tracking Systems for commercial vehicles with rectangular diesel/petrol tanks.

GPS HIGH QUALITY ALUMINUM FUEL SENSOR SYSTEM

GPS tracking systems for all vehicles

Extremely reliable digital fuel measurement reaches 99% precision providing the most accurate fuel data and enabling to fully control and save on fuel costs.

- Measurement precision 99%
- Digital measurement
- Analogue: Voltage, Frequency

Real time fuel management that provides accurate reading and also Fuel Filling Alerts and Fuel Theft Alerts. 24 Hour reports showing distance travel with fuel usage for every interval. Reports can be stored up to 6 months.

- Report shows normal fuel consumption and decreases slowly.
- Report shows abnormal fuel consumption, and it decreases fast. It could be fuel leaking or fuel siphoned.
- Report shows fuel filling and amount filled.
- Fuel amount does not change and also alerts even after parking and engine off.

Vehicle Movement From 04-Jan-2017 12:00 AM To 04-Jan-2017 03:43 PM

Vehicle Name :BLX5001

Date Time	Location	Event	Speed (km/h)	Dist (Km)	Fuel (Ltr)
